BeeMaid

The Story of Honey

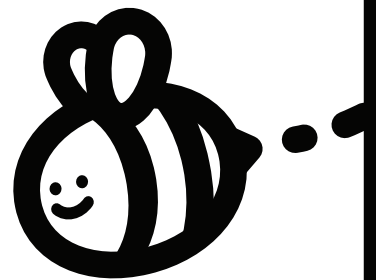

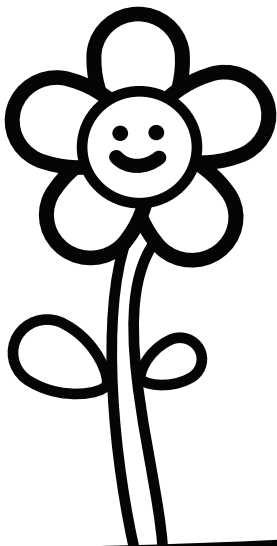

Honeybees are social insects, and live together in a hive. There is one queen bee in every hive.

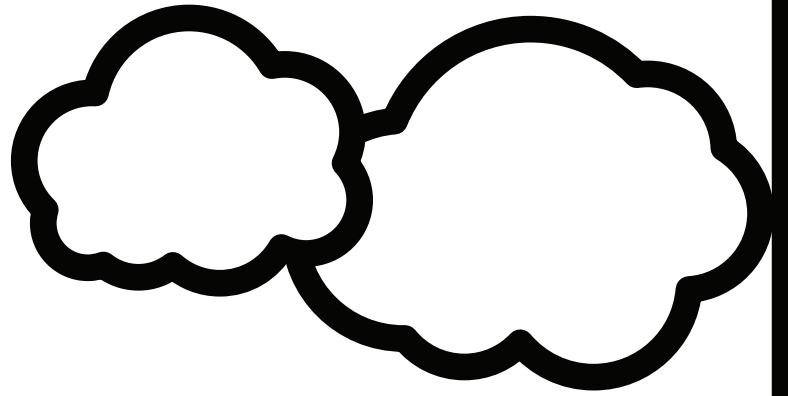

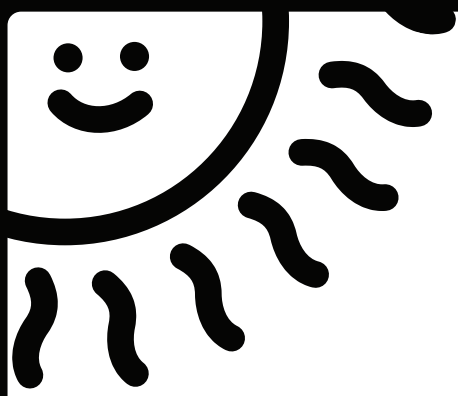

They can't talk, so they use a dance language to tell each other where to find flowers.

They visit flowers to gather nectar, and use that nectar to make delicious honey.

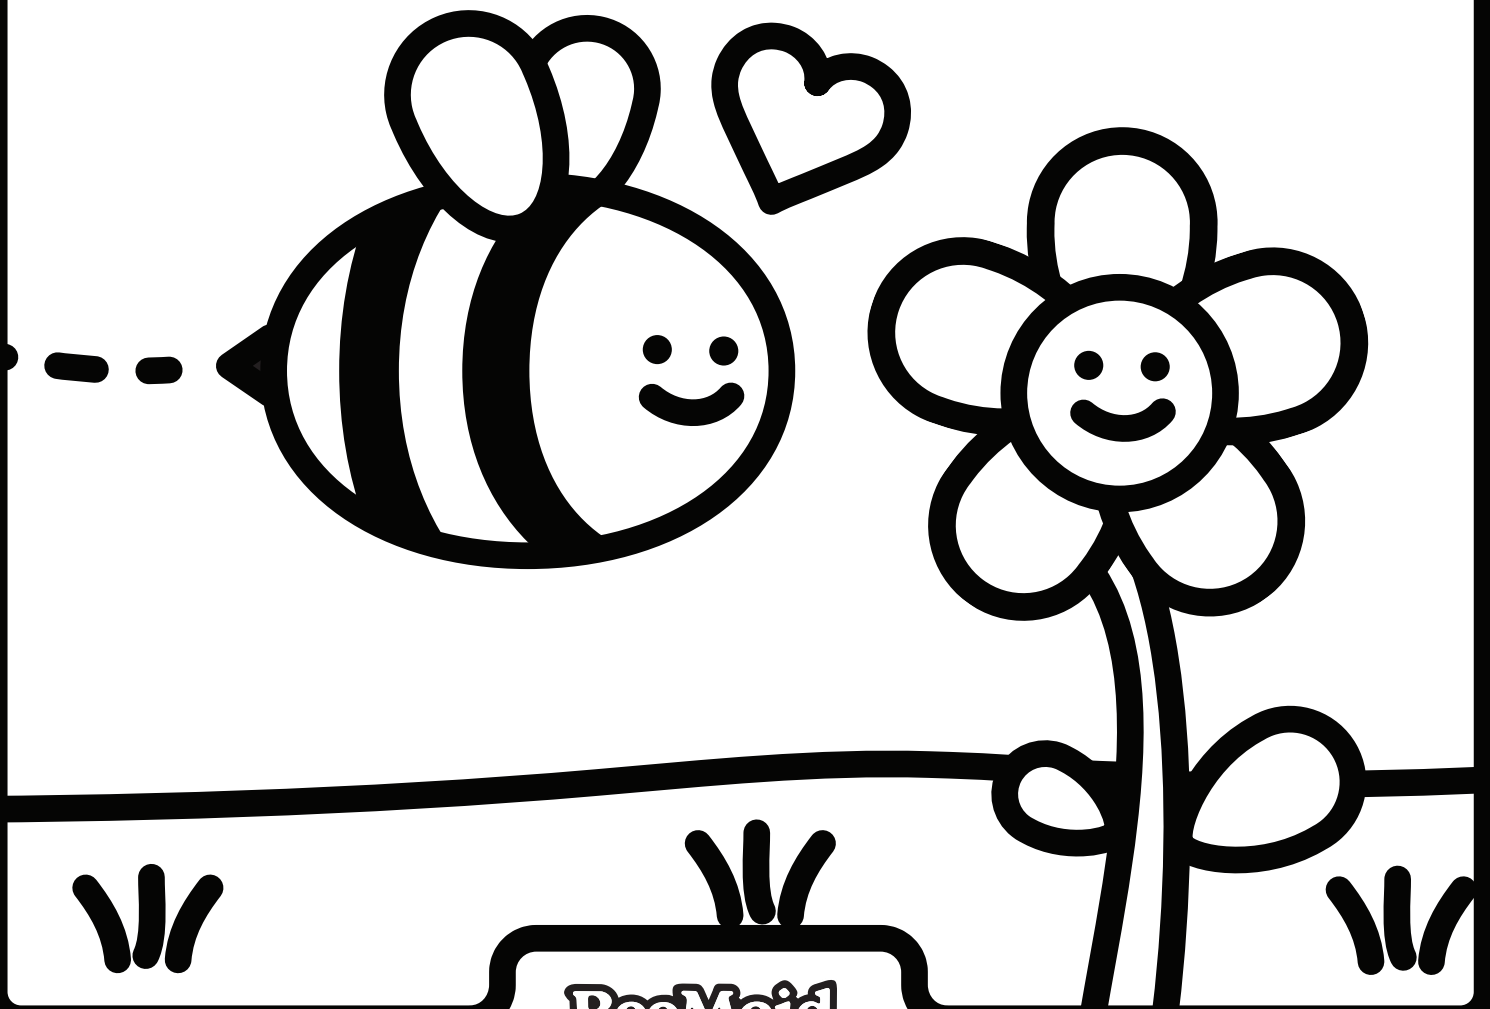

They spread pollen from flower to flower. This helps flowers grow.

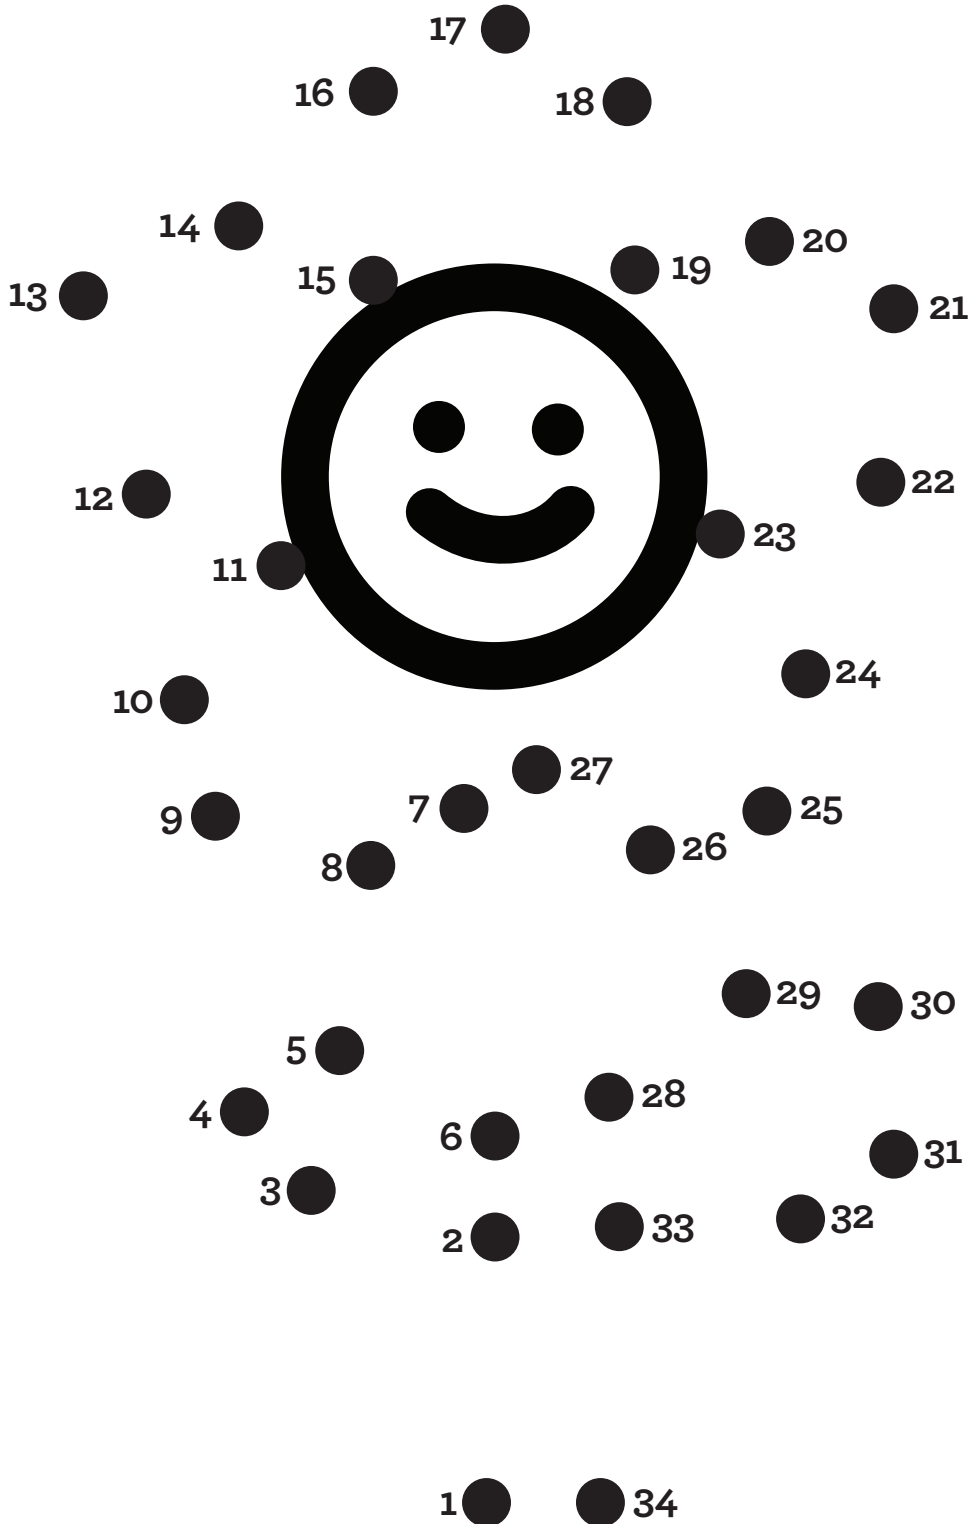

You'll be as busy as a Honeybee once you start all these activities!

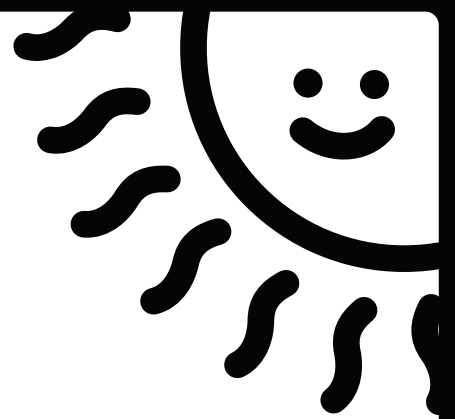

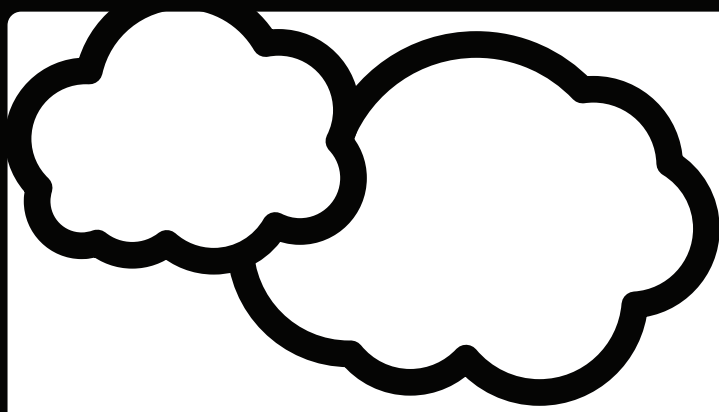

Honeybees love flowers

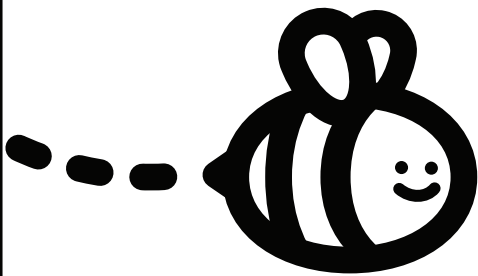

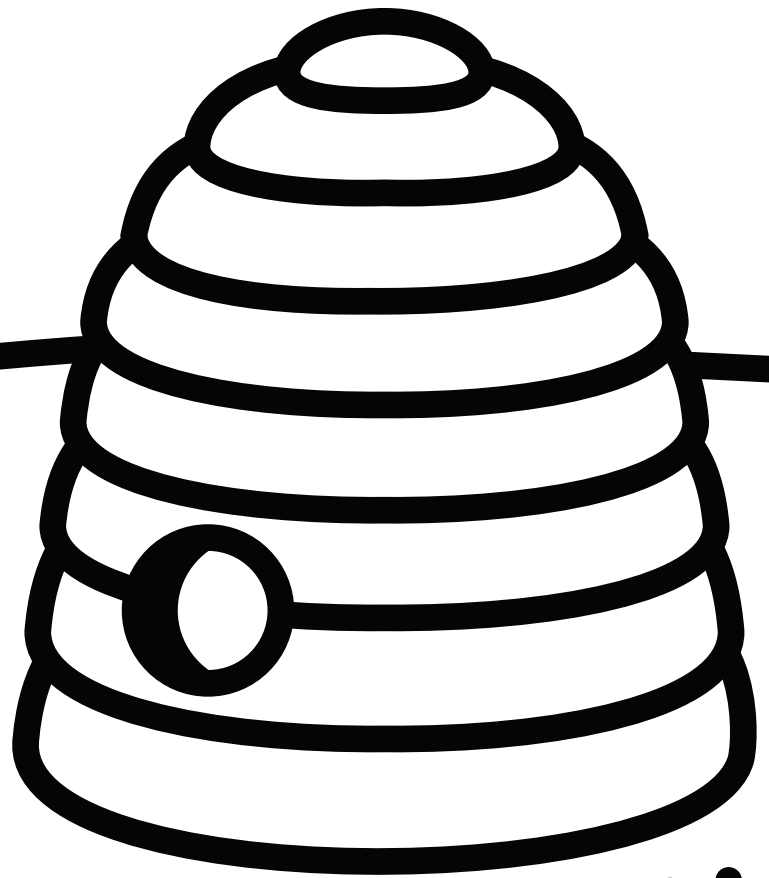

Connect the Dots

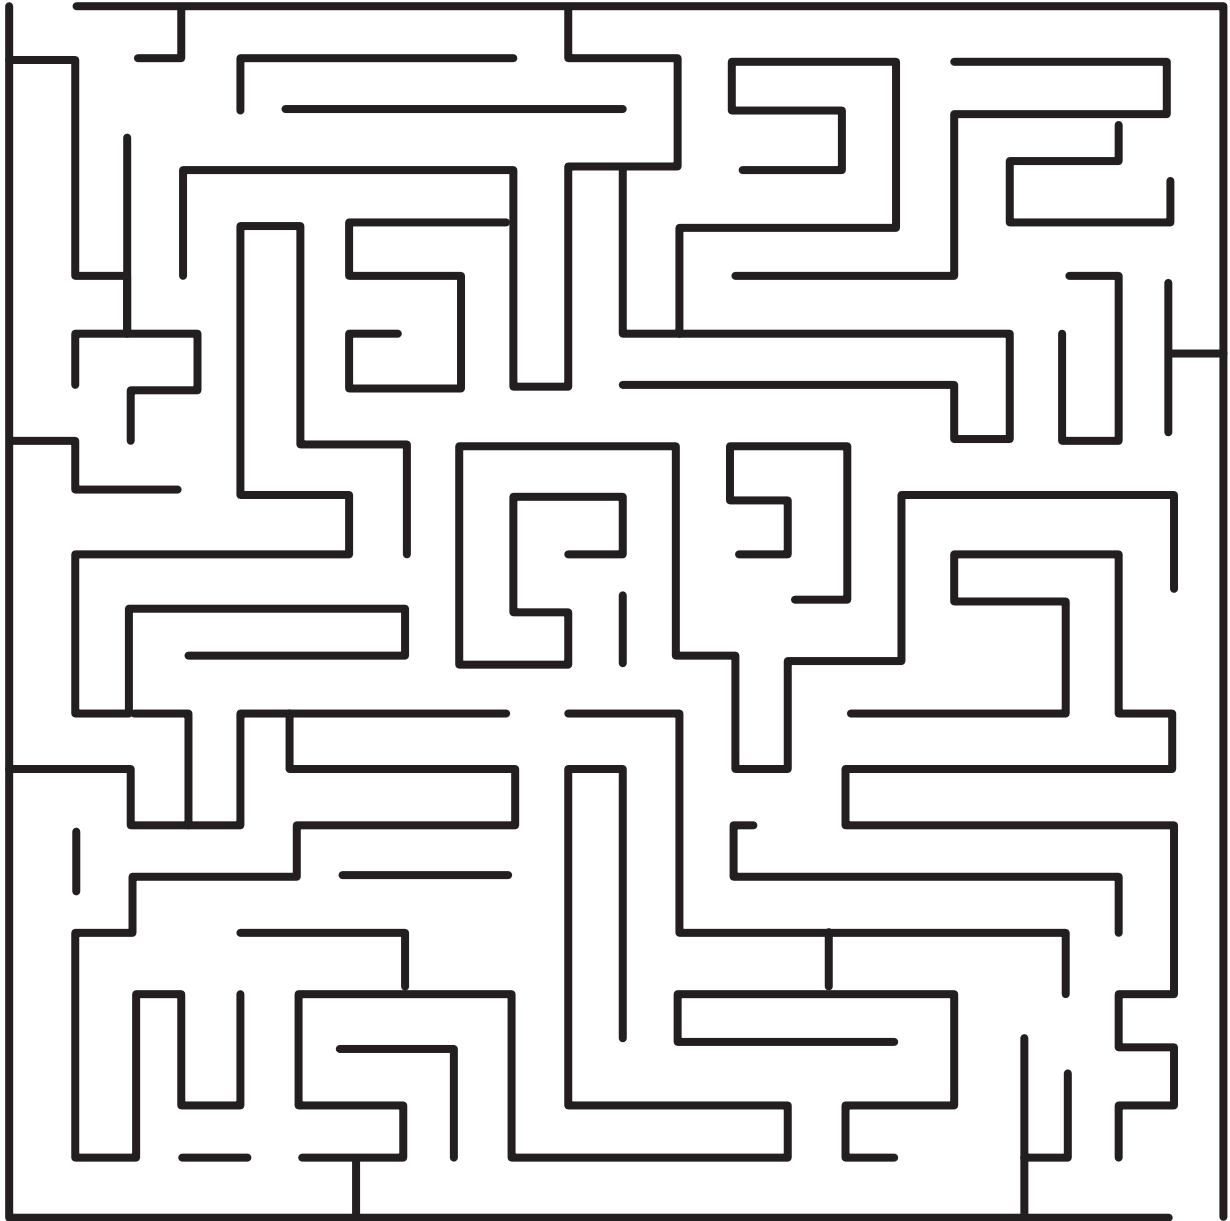

Honeybees live in hives

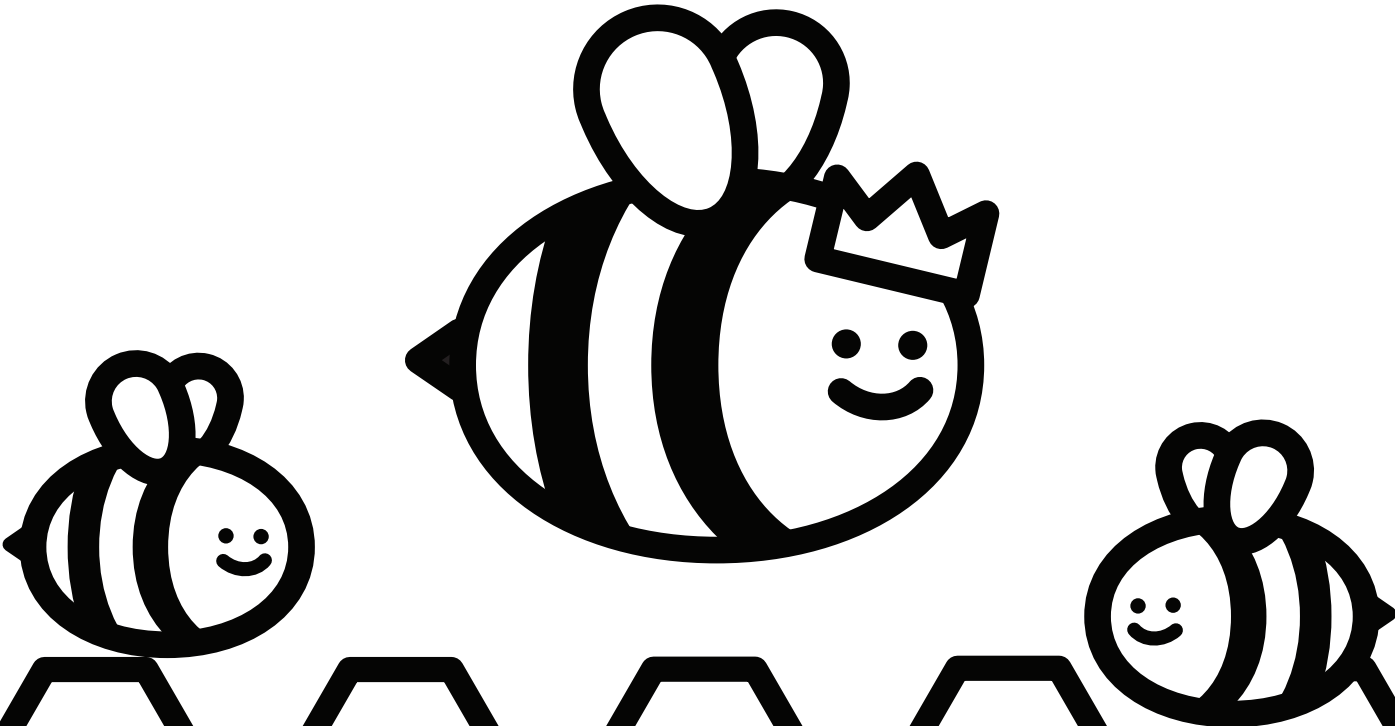

Help the honeybee get to the hive

BeeMaid

Each hive has 1 queen bee
